-

PROFESSIONAL EXPERIENCE

Voici une version naturelle en anglais pour un CV ; tu peux bien sûr ajuster les dates ou technologies si besoin.

Intitulé du poste

Software Developer – Innovative Technology Sarl | Douala, Cameroon

August 2025 – Present

- Company specializing in the design and maintenance of core banking systems and applications.
- Development and maintenance of business applications for account management, loans, transfers, savings, and related banking operations.
- Design and implementation of functional modules aligned with complex banking business rules.
- Integration of banking APIs and third-party systems (payments, reporting, regulatory compliance).
- Evolutionary and corrective maintenance of existing systems, ensuring high availability and strong performance.

- Collaboration with functional teams to gather, analyze, and translate business requirements into technical solutions.
- Active participation in Agile ceremonies (sprint planning, reviews, retrospectives) and code reviews to ensure code quality and knowledge sharing.
- Contribution to continuous improvement of development processes and overall software quality.
- Setup and maintenance of CI/CD pipelines for banking applications, enabling reliable and reproducible deployments.
- Containerization of applications with Docker to standardize development, staging, and production environments.
- Automation of build, test, and delivery processes to shorten time-to-production and reduce release risks.
- Monitoring of production applications with proactive incident and alert management.
- Configuration and administration of server environments to guarantee high availability and resilience of core banking systems.

FullStack Developer – Obosso IT (AFAYA Group) | Douala, Cameroon

July 2023 – July 2025

- Developed and maintained an internal medical and hospital management web application for the AFAYA Group.
- Designed and implemented a social networking web application for doctors (Medin Plus).
- Built a microservices-based ride-sharing mobile application (Click & Go).
- Designed and implemented CI/CD pipelines for client products, automating deployments and increasing velocity.
- Created optimized Docker images for internal applications and microservices, reducing load times.
- Integrated modern and ergonomic UI designs for CESE France tender responses.
- **Technologies:** Next.js, Tailwind CSS, Figma, Jira.

FullStack Developer | AGMA Organisation Technologies Inc. | Montreal, QC, Canada (Remote)

June 2021 – July 2023

- Developed a comprehensive Kanban solution (internal emailing, billing, client management, project management).
- Created a desktop time-tracking and activity-monitoring software (Python) for remote workers, integrated with the Kanban application.
- Redesigned the interfaces for an antivirus software (DrakaShield) using C# and Guna UI, and implemented the sales site and back-office.
- Coordinated team activities as a Team Leader, utilizing Agile (Scrum) and DevOps methodologies for rapid delivery.
- **Technologies:** Laravel, C# & Guna, Python, Tailwind CSS, Bootstrap, PostgreSQL, MySQL, Stripe, Swagger, TypeScript, Docker, Git, Socket.io.

PERSONAL PROJECTS

Fluidio Shop

- Fluidio Shop aims to revolutionize local and online commerce by bringing together sellers, buyers, and affiliates on a single, intuitive platform. Thanks to geolocation, users can find products near them, track their orders in real time, and benefit from a powerful affiliate program to monetize their network.
 - Downloadable from my portfolio <https://m6tm.github.io>
 - **Technology** : Flutter
